### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2816

1. The amendment filed on 4/21/03 has been received and entered in the case.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-9 and 35-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishimura et al.

Note Fig. 3, where the "first amplifier stage" reads on the combination of FETs Q20 and Q21; the recited "non-linear load" reads on the combination of FETs Q3, Q4, Q11 and Q12; the recited "second amplifier stage" reads on the input pair of isolated gate FETs Q7 and Q8 in combination with the cross-coupled pair of isolated gate FETs Q9 and Q10. Not disclosed is the recited "switch" (line 3 of claim 1) but such would have been obvious to those having ordinary skill in the art because such switches are old and well-known in the art for the well-known purpose of equalizing the output nodes of a differential amplifier prior to comparing the potential difference across the output nodes. The same is true for the limitation of a second switch across the output nodes of the second stage.

Art Unit: 2816

4. Applicant's arguments filed on 4/21/02 have been fully considered but they are not persuasive.

The traversal of the officially noted fact that switches are old and well-known in the art for the well-known purpose of equalizing the output nodes of a differential amplifier prior to comparing the potential difference across the output node is not persuasive. Several of the references previously cited show such a concept, as well as the several new references attached to this office action.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the

Art Unit: 2816

statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth B. Wells whose telephone number is 703-308-4809. The examiner can normally be reached on Monday through Friday from 7:30am to 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy P. Callahan, can be reached at 703-308-4876. The fax phone numbers for TC2800 are 703-872-9318 (before final) and 703-872-9319 (after final).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is 703-308-0956.
